

Pre-Paid

Pre-paid is very simple. The entire economy is pre-paid. Look at it this way: We have a car sitting on a dealer's lot. You walk up to buy the car. Does the dealer ever tell you "I am glad you are going to buy this car because we have to find out how we are going to pay for this car to be built." No is the answer you would get, but that is exactly what they are doing when you go to the bank to get a loan. When do they ever build something and then talk about how they are going to finance it to be built. The product was paid for when the contract was put in place to collect the industrial recourses through the Army Corp of Engineers, EPA, DOT, and OSHA in Flint, Michigan to build it. Even more precisely, the item was paid for when the census did a per-capita poll to identify how much money those agencies should put into the economy based on our productivity, (unfortunately take a quick look at Marxism and Keynesian Economics to make a connection with your worth and your previous status). Now everybody with a head (per capita) raise your hand. Good they loaned against you to finance the operation, that is the "Principal Account." Making the item pre-paid for the acceptor. This is another reason why you are the principal. The principal reason you are Pre-Paid is because Christ's acceptance of the sins in the Garden of Gethsemane and His death on the cross, created the Pre-Payment of all your liabilities both temporal and spiritual because they are inseparable because I wasn't here two thousand years ago but My sins were pre-paid on the condition that I accept the Redeemer. You are the source of economic production being the principal and your interest accruing from you i.e. a per-capita census statistics was pledged as the collateral to be the sponsor of the monetary systems' credit. That is why when interest that accrues from the principal gets returned (tax returned) to the principal, there is a decrease in tax liability (a deduction). The vendor is paying his taxes to you. That is why it is a tax matter. Tax is just a return of the interest to the principal.
